EXPERIENCE

EVA Pharma | *Backend Developer Intern (EVA AI Hackathon)* Jul. 2026 – Present

- Architecting an enterprise module end-to-end within a **Domain-Driven Design (DDD)** architecture using **.NET Core** and **Angular**.
- Designing Domain, Application, and API layers implementing aggregate roots, domain events, and dynamic DTO mappings with **EF Core**.
- Authoring comprehensive technical solution architecture documents and system specifications under senior engineering mentorship.
- Collaborating in an Agile setup and validating RESTful APIs via **Swagger/Postman** to ensure robust system integrations.

GB Corp. | *Backend Development Intern* Aug. 2025

- Architected and deployed a multi-tenant authentication module using **Django**, centralizing access for 3 internal tools.
- Engineered **10+ RESTful API endpoints**, crafting Postman validation suites to eliminate regression bugs prior to deployment.
- Refactored backend components for modularity, accelerating team feature development speed by an estimated **20%**.

PROJECTS

Medify – Multi-Tenant Medical SaaS Platform | *TypeScript, Next.js, Django, DRF* Feb. 2026

- Architected a multi-tenant SaaS builder enabling clinics to deploy custom subdomains with dynamic, isolated configurations.
- Engineered asynchronous scheduling pipelines and integrated AI patient assistants to maximize system throughput.

Event-Planner Platform | *Go (Golang), React, Docker Compose, Nginx, MySQL* Dec. 2025

- Developed a containerized event management platform orchestrating decoupled Go and React services via **Docker Compose**.
- Optimized container infrastructure using multi-stage Alpine builds, reducing the backend deployment footprint to **~15MB**.
- Configured an **Nginx reverse proxy** to handle static file routing and client-side caching, minimizing upstream service load.

Windows Management Utility | *C#, Windows APIs* Nov. 2025

- Constructed a system-level CLI utility leveraging native Windows APIs to **automate 4 core OS configurations** (themes, package management, power states).

EDUCATION

Cairo University, Faculty of Computers and Artificial Intelligence Sep. 2022 – Jul. 2026

B.Sc. in Software Engineering (GPA: 3.05/4.0) Giza, EG

- **Relevant Coursework:** Software Architecture, Algorithm Analysis, Database Engineering, Operating Systems, Computer Networks, Distributed Systems, Software Testing.

CERTIFICATIONS & ACHIEVEMENTS

Red Hat OpenShift Development I | *Introduction to Containers with Podman* Dec. 2025

Fullstack .NET Web Developer | *Digital Egypt Pioneers Initiative (DEPI - MCIT)* Dec. 2025

ISTQB Certified Tester Foundation Level (CTFL) | *ISTQB* Oct. 2025

SKILLS

Languages : C/C++, Go (Golang), Python, C#, Java, SQL, Bash, JavaScript, TypeScript

Frameworks & Architecture : .NET Core, Angular, Django, Next.js, Spring Boot, Django REST Framework, RabbitMQ, DDD

Tools & Infrastructure : Docker, Podman, Git, GitHub, Postman, Vim, Linux, Nginx

Databases : SQL Server, PostgreSQL, MySQL
